

## LEAN CONSULTING SOLUTIONS

***Are you operating on a razor-thin profit margin? Create more value with less work and boost your competitive edge by going Lean***

Winning in today's competitive world means being more efficient, doing the "right work" and creating value for the customer. "Value" is defined simply as an action or a process that the customer is willing to pay for.

Lean is a tried and true approach to making meaningful and impactful changes in a cost effective way. More a journey than a destination, Lean is a culture of continuous improvement and a commitment to excellence that sparks employee empowerment and unleashes real innovation.

### **Lean is simple, not mysterious**

Many performance improvement methods consume your precious time and money. Plus they can be complicated. Establishing and sustaining them becomes a job in itself.

### **Lean is different**

Unlike traditional approaches which can be considered an expense, Lean is an investment. Lean builds incrementally upon your processes that have been proven to work. And, over time, it changes the way people think about and approach their roles. The organization eventually reduces rework and becomes a well-honed enterprise. The result is an enduring culture shift and a commitment to a higher quality product or service.

### **How can we help you?**

Our Lean experts work with you to:

- Assess your current state
- Map your key processes back to where they belong – lasting customer value
- Plan a top-down strategy of Lean implementation
- Provide the tools you need, such as A3 Problem Solving and Value Stream Maps, to engage your teams in the culture shift to a Lean approach
- Use leading indicators to pinpoint wasteful, non-value-add steps
- Identify opportunities to transform your organization into an efficient, customer-centric success story

With Lean you can expect to get more back from your dollar than you spend because Lean taps into the collective brain power of everyone in the organization.

Let us help you get value for every dollar you spend in ways that are traceable to the bottom line. Our Lean experts can help you unleash a culture of change that leverages the power and wisdom that is waiting to be tapped.
